

Jet-Pro[®] SofStretch[™]

Hot-Peel Inkjet Transfer Paper

version 1.4.2

JET-PRO[®] SofStretch[™] Heat Transfer Papers are designed for the heat transfer of photos and images using ink jet printers to light colored T-shirts, sweatshirts, mousepads, coasters, puzzles and leather goods. Choose garments that have a tight weave. This is particularly important when transferring to sweatshirts.

You Will Need:

- Cotton or cotton/poly blend garment (white or light-colored), polyester or other substrate listed above.
- Inkjet printer (no laser printers or color copiers)
- Commercial heat press

1. Printing The Transfer

- Insert a single sheet of transfer paper into the printer with the printable surface loaded correctly for your printer. (See your printer manual if necessary.)
- Mirror or flip image prior to printing.
- Print image.
- Trim away any unprinted paper around the image.

2. Transferring Using Commercial Heat Press

- Place garment on press pad. Center transfer on garment (print-side down).
- Press at 375°F (190°C) with high pressure for 30 seconds.
- Peel transfer immediately from garment, using firm, steady pressure.

5. Washing Instructions

- Turn garment inside out and wash in cold water using a mild detergent. Do not use bleach.
- Dry on low heat setting.
- Do not iron directly on the transferred area.

6. Storing Unused Transfers

- After opening transfer paper, store unused sheets in a resealable poly bag on a flat, cool and dry area.

INK JET

WHITE and
LIGHT COLOR

NO HAND IRON

TEMPERATURE	375°
PRESSURE	Heavy
TIME	30 seconds

IMPORTANT NOTES:

Printer & Copier Inks

T-ShirtSupplies.com offers papers for inkjet, laser, and thermal wax printers and copiers. In all cases, our papers are optimized to perform with OEM inks and toners. T-ShirtSupplies.com does not warrant use of aftermarket inks and toners, and cannot guarantee results. We recommend that you test any non-OEM inks or toners prior to use.

Product Quality Assurance

T-ShirtSupplies.com conducts exhaustive testing on all its products, using many types of substrates, printers, copiers, heat presses, irons, and laundry detergents. However, it is impossible to duplicate all printing and transfer processes, so we recommend testing your chosen paper to determine its suitability to your needs and equipment. Please visit our knowledge base at www.tshirtsupplies.com for more information.
