

Printing and Transfer Instructions for JetWear Double Greenline Recommended for White and Light Colored Fabrics Only

WHY IS THIS PRODUCT UNIQUE?

- Can be used on different Fabrics Substrates
 - No special laundry instructions are necessary
 - Iron or heat press gives similar image appearance

IMAGE PRINTING

DO NOT OVERSATURATE COLORS. IT WILL NOT ENHANCE TRANSFER QUALITY. A LITTLE COLOR GOES A LONG WAY.

- Design or select image on the computer.
- Mirror image before printing
- Print image on the coated side of transfer paper
- Allow the printed image to dry before transferring
- Trim ¼ to ½ inch around image if desired before transferring

HEAT TRANSFER APPLICATION

Commercial Heat Press

- Set heat press at 375- 400 degrees Fahrenheit and allow to come to set point
- Set press for medium pressure.
- Pre-heat garment for a few seconds to remove moisture or wrinkles.
 - Place transfer paper face down and press for 25- 30 seconds
 - **HOT PEEL ONLY.**
 - **For a SOFTER HAND stretch garment while HOT**

Home Hand Iron

- It is best to use a smooth, hard, non-porous surface.
- Preheat the iron on the highest setting (**Cotton/Linen**). Do not add water to the iron
- Allow the iron to pre-heat for 5mins.
- Place a pillowcase on the ironing surface. Iron to remove wrinkles.
- Pre- iron the fabric to remove any moisture and wrinkles
- Place transfer paper face down onto your garment.
- **Using firm pressure, slowly iron over the entire surface with sufficient overlapping for 2-3minutes**

- i. **back and forth**
 - ii. **bottom to top and**
 - iii. **along the edge moving continuously**
- **HOT PEEL ONLY.**
 - For a **SOFTER HAND** stretch garment while **HOT**

- Patent Pending -

Epson R200	Photo –Quality inkjet	Photo / Best Photo
Epson 4000	Photo-Quality inkjet	Automatic

LAUNDRY INSTRUCTIONS

Wash and dry your transfer according to your fabric's normal wash instructions.

STORAGE CONDITIONS

Always store unused paper in a cool and dry area sealed in a plastic bag so paper is not exposed to any excess moisture.

NOTE: Testing procedures to simulate real- world use have been established and applied to our paper products in our technical and research department. We have tested our products on multitude substrates, using different printers, transfer equipment, detergents, and washing processes, etc. We still recommend that you test the paper on your chosen printer and material as it is impossible to duplicate every printing or transfer application.
